About This Game

The game takes place in the year 3019, RRRR2 is the continuation of the game RRRR, now three super-soldiers Rabbit, Raccoon and Deer are in a dangerous world full of dangers and deadly traps. Find out the continuation of the history of RRRR, fight with alien enemies and dangerous robots. The game has more references to famous characters :)

Each character can use two types of weapons, collect ammo jump starting from the vertical parts of the platforms. In the game you have to look for hidden secrets, open doors, use various mechanisms. Robot Rabbit owns a super-attack, Robot Raccoon can deadly act on an enemy at a short distance, Reindeer can search for hidden objects.

Special features

- Control three characters one by one.
- Explore locations
- Three characters to control one by one
- Two types of weapons
- Hidden objects

This is a nice little game to spend some relaxing time. It is not always as simple as it seems, but it is enjoyable.. Should support mouse and keyboard :(Remember, it may be the tank's job to take the damage, but it's the healer's job to take the blame when anything goes wrong.. For the price, this is pretty cool!

The UI leaves something to be desired in spots. Like for some reason you have to hit enter on the keyboard to confirm engineering when everything else can be done with the mouse. And there's some typos here and there. And the tutorial doesn't really explain everything, like that you have to unlock the other colony pods, I only stumbled across that in the quests screen. It feels a little early-access-ish, but it just came out and maybe there will be some polishing patches.

BUT, for 5 bucks (three on sale right now), it's a really chill little "wander around the universe" game where you scan planets and maybe terraform them a little, and put down colonies to make more money to buy more stuff. And then occasionally you can like, use something called THE WORLDTAKER to basically a kill a sentinet planet and use its neuro network to build a really good colony and that kind of makes me feel like a monster, and that's fun. And I guess I could bomb the colonies that the other alien races set up if I ever find the stuff to do that?

If this was priced higher, it would be hard to recommend, to be honest, but there's a lot there for cheap and so far it's been a really relaxing little game to chill out with while I watch tv or listen to a podcast. So, thumbs up.. The game is exactly what you should expect from a classic old school shooter. Its fast, chaotic, colourful and complimented by an awesome heavy metal soundtrack. I grabbed it on sale and it was a steal at the price let alone full price! I recommend this game to anyone who loves arcade indie games and high scores! I will be returning to take the top position on those leader boards!

- + Fast paced fun
- + High score leader boards
- + Awesome heavy metal soundtrack
- + Smooth controls
- + Inventive menu system and cool 90's filter available
- + Tough as nails!. A unique and fun experience. Worth your time and money.. It was a really charming thing, aaaaand then it croaked.

Well, schnitzbubbles.. Hey Wargaming, why does your game not have bot matches?. I bugged out repeatedly, unable to advance the story due to inoperable, yet required, activatable transition points. It was interesting but, I will have to wait until it's further along.. You play as a kid at the hands of an abusive mother and later as a man that lived through a life of mediocrity that eventually pushed him over the edge.

You start as a young boy while you replay the most painful memories of your character's older self. Through the game you also dialogue with a old man (your future self) as in your last breath you reflect on what you were and what you lived through until the release of your last moment.

I'd give this game a solid 9/10, it felt a bit short but damn was it worth it.

Super Meat boy meets Bob Ross. Having to navigate levels that are as challenging as the famous super meat boy, while trying to select the color you need for the next jump so you don't die. (We don't make mistakes, just happy little accidents, yeah right Bob Ross you never painted with this...). The levels are simplistic at first glance but as you get into you see that they are quite of bit complexity to it that they continue to build upon as the levels progress. I cannot wait to see where this game goes and I am excited to find out. 5/5 good job boys. PS. Where Orange?. This is Puzzle Bobble\Bust A Move in VR where you can throw the balls with either hand and mix balls to make different colors. It's fun, looks great, and has good music.. Pretty good experience, fun with friends! VRs mode not the best however, COOP is where its at.. Free DLC? I'm in!

I've been playing Sandbox on my iPad for a while, and it is a fun game.

Plus, the FREE DLC with more humans makes it a lot better.

It's worth the \$10.. This is one of the best bullet hells here available on Steam (of course it's not touhou but it does its work pretty well), and it's totally worth it (more if you can get it on sale). The third part of the Gundemonium Recollection, and a vertical scroll (instead of horizontal like its predecessors), with very charming characters and of course a Japanese touch. The other two games of the Gundemonium Collection are great too, so if you want to get it, don't doubt it.. I went back and forth on whether or not I wanted to recommend The Yawhg to others. In the end, I decided on a no because, while it is in equal measures unique, fun, and visually appealing, The Yawhg is, quite frankly, not worth the asking price.

On one hand, I really want other people to experience the Yawhg's interactive story. The art is a delight to look at, the writing, although brief, is clever, and most importantly, it's fun, especially if you sit at a computer with a couple friends and play it as a co-op.

On the other hand, the game is too short. And I say this as someone who will happily shell out money for short, high-quality games. A playthrough of The Yawhg will last 10-15 minutes at best. You could argue that this is because The Yawhg is meant to be played multiple times, but after five playthroughs, which only took me an hour, I felt like I had seen everything there was to see.

The "randomized" events are not randomized enough (for example, --mild spoiler-- if you go to the hospital at a certain point in time, your event will always, always be the patient with the sores, which leads into the same chain of events that last the rest of the game). In an even bigger flaw for a game trying to accomplish what The Yawhg is, there also aren't nearly enough events, which is why I felt like I had seen at least 90% of them by the fifth playthrough.

More of a subjective complaint, and another mild spoiler, but I found the ending to be a letdown. Not just in the "wait... that's it? The game is already over??" sense, but also because I felt like the narrative leading to the ending didn't fit what happened at the end. I do realize that it was intentionally misleading, but just because it was intentional doesn't mean it was carried out well.

I love games as a storytelling medium, and I'm so on board with what The Yawhg was trying to do, but it fell short in almost every area. If it had significantly more content, or if it cost \$5 instead of \$10, I'd be badgering everyone I know to buy it. As it stands, I'd save your money and wait for someone else to come along with a better execution of this very cool concept.

R2-10L update:

- Added and revised levels, now there are 10 levels in the game!
- Improved game balance.
- RRRR2 supports the ability to play up to 3 people at one computer with support for 3 keyboards or 3 gamepads.

We continue to work on the achievements and balance of the game.
